

# **BST Questions**

# Question 1:

## **Range Sum of BST**

We have a Binary Search Tree consisting of N nodes and two positive integers L and R, the task is to find the sum of values of all the nodes that lie in the range [L, R].

## Sample Input1::

Sample Output1:11

# Question 2:

# Find the closest element in Binary Search Tree

We have a binary search tree and a target node K. The task is to find the node with minimum absolute difference with given target value K.

Sample Input 1:5

**Sample Output 1**: 5 (difference is 0)

Sample Input 2:.19

**Sample Output 2**: 20 (difference is 1)

## Question 3:

### Find k-th smallest element in BST

We have the root of a binary search tree and K as input, find Kth smallest element in BST.

Sample Input 1: k=3
Sample Output 1:8

Sample Input 2 : k=5Sample Output 2 : 5

# Question 4:

### **Two Sum BSTs**

Given a BST, transform it into a greater sum tree where each node contains sum of all nodes greater than that node.

# Sample Input 1:

# Sample Output 1:3

x = 16

The pairs are: (5, 11), (6, 10) and (8, 8)

# Question 5:

## **Maximum Sum BST in Binary Tree**

We have a binary tree, the task is to print the maximum sum of nodes of a sub-tree which is also a Binary Search Tree.

# Sample Input 1:

Sample Output 1 : 8
